# Media Fusion Software™

Robe's Media Fusion Software is video software which aimed at lighting designers wanting to incorporate video into their creative work. Media Fusion Software will run on numerous computers, ranging from inexpensive laptops to powerful servers. It plays many different video file formats, and processes them through a large number of effects. It can be used in several different show environments, e.g. live shows and concerts, TV productions, clubs and bars, theatres, shops, museums and retail, trade shows as well as for architectural lighting applications.
